

LAKSHAY GARG

DEVOPS ENGINEER

OBJECTIVE

To obtain a challenging Devops Engineer position where my expertise, problem-solving skills, can be used in real world scenarios and drive business objectives.

EXPERIENCE

Infrastructure Specialist

IBM India | Apr 2023 – Present

- Engineered and implemented infrastructure automation on IBM Cloud using Terraform and Ansible, creating scripts based on client requirements.
- Optimized and managed Tekton pipelines to streamline and monitor automated build, test, and deployment processes.
- Developed a web portal to facilitate new client onboarding for architects to enable 1-click deployment of all required infrastructure based on various inputs.
- Oversaw the maintenance and troubleshooting of Kubernetes and Docker environments, including OpenShift, ensuring robust and reliable operations.
- Coordinated with diverse teams to devise solutions, resolved web infrastructure challenges, and conducted knowledge transfer sessions for new team members.

Webapp Specialist

Kyndryl, India | Apr 2022 – Apr 2023

- Configured and supported infrastructure across GCP (Google Cloud Platform), using Terraform and Ansible, aligning with client specifications.
- Oversaw and optimized web application infrastructure, including WebSphere ND and Tomcat, as well as web hosting environments like IHS and Apache Web Server.
- Managed and troubleshooted Kubernetes and Docker platforms, including OpenShift, ensuring effective deployment and operation.

System Engineer

Infosys, India | Jun 2019 - Apr 2022

- Managed and optimized web applications and hosting environments, including WebSphere ND, Tomcat, IHS, and Apache Web Server.
- Oversaw the maintenance and troubleshooting of Kubernetes and Docker platforms, including OpenShift, ensuring effective application deployment.
- Partnered with cross-functional teams to design and implement tailored solutions for clients, addressing technical requirements and challenges.
